You are being invited to participate in a survey that evaluates the quality of Linked datasets according to these dimensions: Availability, Provenance, Licensing, Currency, Understandability, Versatility and Representational-Conciseness.

Title of study: Verificating and validating semi-automatic quality of linked datasets

Ethics Application Number

Researchers:

Prof. Dr. Ig Ibert Bittencourt, Computing Institute (57072-970), ig.ibert@ic.ufal.br (Supervisor)
Danila Feitosa, Computing Institute (57072-970), dfcco@ic.ufal.br (Master student)

Purpose and Procedure: this research aims to validate the approach called LinkedDataSetEvaluation, composed of dimensions and metrics that increase the quality of these Linked Datasets. We defined some questions related to the quality of linked data and we would like to have your feedback for the success of this research.

Potential Benefits: findings from the study could lead to a better understanding of the quality of linked datasets related to dimensions, metrics, criteria end best practices for publishing linked data.

Potential Risks: there are no known risks in this study.

Confidentiality: this survey is hosted by Google Inc. ("Google") that protects the users access or unauthorized alteration, revelation or unauthorized destruction of information that they hold. The Google Privacy Policy is available in <https://www.google.com/intl/pt-BR/policies/privacy/>

Dissemination of Results: aggregated results in this survey will appear in Masters dissertation.

Right to Withdraw: participation in this survey is voluntary, and you can decide not to participate any time, or choose not to answer any questions you don't feel comfortable to Survey responses will remain anonymous. Since the survey is anonymous, once it is submitted it cannot be removed.
